

Extra-comfortable well-being for every age

The Comfort element sauna convinces in both function and looks: Convenient entrance via wide door, free vision through large glass elements without corner posts, large and beautifully shaped door handle for safe entry or exit, three-level interior, wide and comfortable benches, moveable and ergonomic backrests. ... And last but not least a powerful sauna heater, which is easily accessible and designed in extravagant fashion.

- Walls and ceiling in visible areas are made of elegant massive wood panels in 19 mm fir in cartridge construction.
- Strong base frame in water-resistant aluminium.
- Integrated design light unit, joined sophisticatedly to the ceiling construction
- Elegant glass front across corner consisting of ESG glass elements without additional corner post
- All-glass door in clear ESG glass
- High comfort interior on 3 levels with convenient first level in low height in almost knotless Aspen
- Ergonomic backrests, moveable for greater relaxation
- Bench aprons
- High quality sauna heater type Cava, power 9 KW with soapstone and stone basket, outside shell in modern stainless steel.
- 30 kg of sauna stones

High quality panels in full wood, made of fir, with the softly rounded interior in aspen.

Because of its high quality features and exquisite optics the Comfort sauna can be integrated into high-profile bathrooms.
