

Breathtakingly beautiful...

Design without compromise: latest fashion colours, modern contrast of light and dark colours and an exquisite mix of materials such as wood, varnish, glass and stainless steel. This is Cube, our design sauna cabin in extra class.

The Cube Sauna cabin does not only provide smooth integration of well being into modern living or bath room environments. It is also an eye-catching feature that upgrades room decoration and presents a functional device for sophisticated interior design. With Cube the transfer from living area to bath room becomes more fluent.

An attractive contrast is being created between the dark Wengé veneer wood and the light interior in Aspen, which shines through the partly glazed glass front.

As an option, a moveable panel with a varnished, lightly green coloured surface is available. It is both a design feature and a functional element.

Fine material, perfect surfaces, clean workmanship – the Cube is convincing in every detail

The sauna heater CAVA features an extravagant mix of material: its elegant form in stainless steel encloses strong soap stone slats. Beneath those 30 kgs of sauna rocks are hidden.

- Outside Wengé veneer / inside aspen
- Fittings in stainless steel
- Glass front in ESG clear glass, partly glazed
- Option: moveable panel with mirror
- Option: LED light changer
- Three sizes 187x203, 204x203 and 212x203 cm

With or without sliding panel: the Cube always looks very fashionable.
