

the exclusive wellness oasis

Special requirements in design and high demands in sauna climate will be fulfilled by the model Supreme. This cabin is also structured in our interconnected log system.

Within this advanced and robust structure high quality material in 58 mm almost knotless fir is connected in elements to provide the most pleasant sauna climate. No further material is used for insulation. The elegant interior in Aspen contributes to the special looks and rounds up the cabins exquisite mix of design and sauna feeling.

Harmony of the elements

Health and inner calmness – where are you able to switch off, fill up with energy and relax in a magnificent way? Feel the cosy warmth coming from a sauna Supreme Elite. Due to precious wood your jewel will shine even without the sauna heat. Chosen fir and aspen combined for real comfort for the senses.

Supreme Elite

Walls and roof out of chosen fir, benches in aspen with relax – backrest

In the Supreme range we combine the interconnected log structure with special fine wood: walls and roof are made of knot free fir. Inside the comfortable interior details merge with the beautiful outside. Combine your personal sauna out of a wide equipment range.

Particularly the sizes can flexibly be chosen between 129 and 269 cm. You can combine dimensions in width and depth.

You may choose your Finesse in 11,6 cm steps, in every size of the grid system starting from 129,1 until 269,3 cm. Finesse and a Supreme may be integrated into a roof incline. The realization of individual drawings can be produced by our technicians.
